Prevents adult horn fly emergence from manure of treated cattle.

A nutritional supplement for beef cattle containing (S)-Methoprene * Insect Growth Regulator for continuous feeding to beef cattle on pasture through horn fly season.

*As the Insect Growth Regulator ALTSID®

ACTIVE INGREDIENT:

(S)-Methoprene (CAS#65733-16-6) ----- 0.01%

OTHER INGREDIENTS ----- 99.99%

Total 100.00%

FEEDING AND MANAGEMENT INSTRUCTIONS

When used as directed, OLS #8-A Die Fly will provide sufficient (S)-methoprene insect growth regulator to prevent the emergence of adult horn flies from manure of treated cattle. Existing adult horn flies will not be affected. Start feeding before horn flies appear and continue use until cold weather marks the end of the horn fly season. Allow free choice to cattle. Cattle should consume an average of 0.4 ounces of OLS #8 A-Die Fly per 100 lbs. of animal body weight per day, which is equivalent to 4 ounces per day for a 1,000 pound animal.

AS A GUIDE: One large diameter tub to every 35-50 head of cattle. One small diameter tub to every 15-25 head of cattle.
